

Jeffrey Ross

New York, NY | ross.jeffrey.js@gmail.com | [LinkedIn](#) | Portfolio (Live AI Systems): jeffrey-ross.me/projects

Portfolio: AI-powered workflow, startup finance, semantic search, and decision-support platforms.

SUMMARY

Technical Product Manager with 10+ years building enterprise data platforms in regulated environments. Leads product strategy and delivery across AI agents, data infrastructure, and workflow automation. Combines hands-on development (Python, SQL, APIs) with strong stakeholder engagement. Proven ability to translate complex data and AI capabilities into scalable, user-centered products.

EXPERIENCE

Product Manager – AI Platforms & Data Integrations

Memorial Sloan Kettering Cancer Center, New York, NY — 2022–2025

- Built and deployed a GPT-powered AI agent for clinical trial eligibility (see live portfolio project), improving screening throughput, accuracy, and consistency with human-in-the-loop validation.
- Owned product roadmap and prioritization across AI and data platforms, informed by stakeholder discovery to define requirements, success metrics, and delivery milestones.
- Directed RFP process and vendor selection for LIMS SaaS platforms, evaluating technical and operational fit within regulated environments.
- Designed and developed data synchronization and API-based services (Python, SQL), improving biobank sample processing time by 50%.
- Implemented semantic search capabilities across research datasets, reducing biospecimen query turnaround time from weeks to hours.
- Led cross-functional teams across engineering, clinical, and operations, delivering AI and data platforms from concept to production.
- Oversaw vendors, budgets, and UAT to ensure successful platform delivery and adoption.

Head of Technology & Product Management

Euromoney Institutional Investor, New York, NY — 2012–2019

- Spearheaded global modernization of a \$100M financial research and events business into scalable B2B SaaS platforms serving regulated institutional clients.
- Owned product strategy and end-to-end delivery for enterprise SaaS platforms supporting client lifecycle, onboarding, and data-driven workflows.
- Built and scaled Salesforce-based platforms (Sales & Service Cloud, Apex, Lightning), integrating Docusign and NetSuite APIs to enable quote-to-cash automation.
- Delivered applications that improved client engagement and reduced operational costs by \$2M annually
- Led distributed engineering teams and established Agile delivery and CI/CD practices across global teams.
- Partnered with Legal, Risk, and Technology to ensure data governance, compliance, and scalability.

Earlier Experience:

- Founder / Product Manager / Developer, Web Mâché (SaaS all-in-one portfolio / commerce platform)
- Co-Founder / Product Manager, I Stand For (SaaS platform, acquired by political strategy group)
- Senior Application Developer, SixDegrees.com (early social network; acquired for \$125M)

Technical Skills: Python, SQL, TypeScript/React, REST APIs, Data Pipelines, GPT-based systems, Palantir Foundry (Ontology, Pipelines), Salesforce Certifications: Administrator, Developer, App Builder

Education: University of Michigan -- B.A.; Columbia University -- Technology & Applications
