New York, NY | ross.jeffrey.js@gmail.com | [LinkedIn](#) | Portfolio (Live AI Systems): jeffrey-ross.me/projects

Portfolio: live AI agents & data platforms (clinical trial matching, semantic search, LLM decision systems).

SUMMARY

Technical Product Manager with 10+ years of building enterprise data platforms in regulated environments. Leads end-to-end product strategy, roadmap, and delivery across AI agents, data infrastructure, and workflow automation, including LLM-powered and agentic workflows. Combines hands-on development (Python, SQL, APIs) with strong stakeholder engagement and vendor management. Proven ability to translate complex data and AI capabilities into scalable, user-centered products.

EXPERIENCE

Product Manager – AI Platforms & Data Integrations

Memorial Sloan Kettering Cancer Center, New York, NY — 2022–2025

- Owned product strategy, roadmap, and prioritization for enterprise AI, research data, and biobanking platforms, partnering with clinical, laboratory, and operational stakeholders to define product requirements, success metrics, and delivery priorities.
- Led product management for implementation of an enterprise SaaS Laboratory Information Management System (LIMS), defining product requirements, directing the RFP and vendor selection process, and delivering operational workflows supporting the complete biospecimen lifecycle (collection, processing, labeling, storage, and metadata management).
- Built and deployed a GPT-powered AI agent supporting clinical trial eligibility, improving screening throughput, accuracy, and consistency through human-in-the-loop decision support.
- Designed and delivered API-based integration services (Python, SQL) connecting LIMS and enterprise research systems, reducing biobank sample processing time by 50%.
- Implemented semantic search capabilities across research datasets, reducing biospecimen discovery from weeks to hours.
- Led cross-functional engineering, clinical, laboratory, and operations teams through Agile delivery, UAT, vendor management, and enterprise rollout.

Head of Technology & Product Management

Euromoney Institutional Investor, New York, NY — 2012–2019

- Spearheaded global modernization of a \$100M financial research and events business into scalable B2B SaaS platforms serving regulated institutional clients
- Owned product strategy and end-to-end delivery for enterprise SaaS platforms supporting client lifecycle, onboarding, and data-driven workflows
- Built and scaled Salesforce-based platforms (Sales & Service Cloud, Apex, Lightning), integrating Docusign and NetSuite APIs to enable quote-to-cash automation
- Delivered applications that improved client engagement and reduced operational costs by \$2M annually
- Led distributed engineering teams and established Agile delivery and CI/CD practices across global teams
- Partnered with Legal, Risk, and Technology to ensure data governance, compliance, and scalability.

Earlier Experience:

- Founder / Product Manager / Developer, Web Mâché (SaaS all-in-one portfolio / commerce platform)
- Co-Founder / Product Manager, I Stand For (SaaS platform, acquired by political strategy group)
- Senior Application Developer, SixDegrees.com (early social network; acquired for \$125M)

Technical Skills: Python, SQL, TypeScript/React, REST APIs, Data Pipelines, GPT-based systems, Palantir Foundry (Ontology, Pipelines), Salesforce Certifications: Administrator, Developer, App Builder

Education: University of Michigan -- B.A.; Columbia University -- Technology & Applications
